

9-The Control Bar and Display

The control bar displays the top bar of the main window.

I can open it or close it by going to View > Hide Control Bar / View > Show Control Bar.

I can also edit the control bar in display by going to View > Customize Control Bar Display or I can also right click in the gray areas of the bar. So if you wonder why you wouldn't see everything you have available in Logic in this bar is because you didn't have it selected.
