### MOM'S BROADCAST CHANNEL

#### COMPOSERS IN THE KITCHEN

##### Reality Cooking Show | Teaser, Scripts

- combines two universal elements: food and music
- CITs from all over the world cook typical dishes from their country and/or culture

The cook is also the composer of her/his particular episode so that the viewer not only learns more about the variety of music but the culinary art—entertainment on various levels. Even the element of competition could be brought in.

#### HOMELESS

##### Reality Documentary | Teaser, Scripts

- touches upon the current situation in many cities
- produced for a mature audience
- critical, political

Not many associate the homeless with music, but actually, there's a huge potential for interesting individual stories. So much talent is hidden in poverty. What would happen if some of those talents would get a chance to change their life!?

#### QUASI TONAL & THE TONALS

##### Animation | Script Ideas

- the target audience is teenagers
- the look is inspired by the show "Central Park"
- music becomes the central element

The Tonal-family consists of the following characters: Quasi (the main character), his two siblings Ey and Bi, and the parents who are Semi and Poly. Quasi's main goal in life is to perform on the piano, but throughout the whole show, we never hear him play a single note!

#### THE KID'S CORNER

##### Various Shows | Family Program

- easy access to music theory for kids and the family
- songs on the ukulele, guitar or the piano
- create a natural funnel into the Academy

MOM owns several (animated) characters who make their appearance in various shows for kids and the whole family. "Roc Tones" or "Calcentin" will turn into leading figures who can bring attention to music in a playful way.

Eventually, the whole Kid's Corner concept will become a connecting block between MOM and MITA as it allows us to demonstrate various musical works from MOM with a healthy dose of education.
